Industry-Wide Pre-Con Search (Feature in Remarketer)

Remarketer now includes a powerful **Industry-Wide Pre-Construction Search** tool, giving agents access to a much broader range of projects beyond what the brokerage has added.

Where to Find It:

- Located in the **left-hand side panel** under **“Pre-Con Search”**

What It Does:

- Lets agents search **active pre-construction projects** from across the entire network of participating developers and brokerages
- Filter by **city, developer, status, occupancy date**, and more
- Preview project details including **renderings, floorplans, price lists, and deposit structures**
- **Allows you to easily email and market pre-construction projects**

Why It Matters:

- You can now offer more selection to your clients — even if the project isn’t on your website yet
- Many projects can be **added directly to your site** or used in **lead capture campaigns**
- Great for staying ahead of market trends and helping buyers explore **VIP access** or **off-market opportunities**
